## User Guide to Formulations Count Platform Updates

# Formulation Counts and the New Survey Process

## Collecting the number of Fragrance material formulations per product

### What is it?

A new step when completing a RIFM Survey designed to capture the number of fragrance material formulations per product that are currently produced by companies that complete RIFM Surveys.

### Why do we want this information?

These data will allow us to include occurrence data in the Creme RIFM Model. Currently, the Creme RIFM Model assumes that all products contain all fragrances which is a conservative assumption. With the new data on the number of formulations produced per product, we can further refine the fragrance exposure assessments and obtain even more realistic results.

### Where and when to access the Formulations Count File?

Formulations Count file can be accessed on the same [Data portal](#) you have been using and the number of formulations will be available from Survey 39.

# Formulation Counts and the New Survey Process

## How to enter the new required information?

There is a new Formulations Count File where the number of fragrance material formulations will be entered. This is a required step and the Formulations Count File needs to be completed and submitted before entering the fragrance concentrations.

Only one value should be entered per product. This value represents the number of Fragrance material formulations that the company produces.

No empty values are allowed. If your company produces no fragrance compounds for a given product, please enter a value of zero.

**Let's explore in detail the new Survey process.**

# **Step by Step Guide to the new Survey Process**

Log in to Data Portal as usual. The starting page has now been updated. Companies are now required to fill in a Formulation Count File before entering the fragrance concentration.

## Survey 039

Closing Date: Not assigned

Please create create and populate the Fragrance Count File and then you can a file for every fragrance you wish to enter data for.

New File

New Formulation Counts File

New File Submission

No files created yet.  
Create the [Formulation Counts File](#) first.

Or alternatively, you can create a  
Formulation count file by clicking on New  
File and then New Formulation Counts File.

## Survey 039

Closing Date: Not assigned

[New File](#)

Please create and populate the Fragrance Count File and then you can add a file for every fragrance you wish to enter data for.

| # | Fragrance                               | Created at             | Updated at | Status |   |
|---|---|------------------------|------------|--------|---|
|   | <a href="#">Formulation Counts File</a> | 21 Jul, 2022, 12:12 am |            | Active | <a href="#">Edit</a> <a href="#">Delete</a> |

The Formulation Counts File will be created. Click on Edit to open the File

The Formulation Count file contains only one row.  
This is because we just need one value per product.

Your data contains 0 errors.

|   | BodyLotionMass | BodyLotionPrestige | DeoSpray | DeoRollOn | BodySpray | Toothpaste | Mouthwash | Lipstick | LiquMakeupFoundation | HairStyling | HairSpray | EaudeToilette | EaudeParfum | AfterShave | Showergel | Shampoo | RinseoffConditioner | FaceMoisturizer | HandCream | BarSoap | LiquidHandSoap |
|---|----------------|--------------------|----------|-----------|-----------|------------|-----------|----------|----------------------|-------------|-----------|---------------|-------------|------------|-----------|---------|---------------------|-----------------|-----------|---------|----------------|
| 1 |                |                    |          |           |           |            |           |          |                      |             |           |               |             |            |           |         |                     |                 |           |         |                |

The value to enter for each product is  
the number of fragrance compound  
formulations that are produced by the  
company with intended use in that product.

In this example, the values used indicate that **in the previous year** the company produces the following:
